

# Professional Grade Magnetic Tag Line

## Improve Safety, Precision and Confidence!

If your workforce moves  
**HEAVY, DANGEROUS**  
steel objects such as

Trench Plate  
Road Plate  
Shoring  
I-Beams

Poles  
Pipe  
Steel Plate  
Dock Plate

**Safe-T-Stik**  
is for you

# Safe-T-Stik Features

Safe-T-Stik is a super strong, durable, magnetic tag line safety tool designed to keep your workforce safer by keeping them further away from hazardous situations without sacrificing control.

The robust "T" handle is comprised of expertly crafted 6061 T6 aluminium and has a very unique ability to twist and lock in 90° intervals. This allows a worker to quickly adapt to different situations. A solid fiberglass rod with comfortable and durable grips gives a worker superior comfort and strength.

A super strong fiberglass reinforced polymer tube makes up the main shaft. This material gives the Safe-T-Stik incredible strength and durability along with UV, corrosion and weather resistance. The main shaft tube also has insulative properties that help protect against electrical shock.

The business end is hand crafted out of 6061 T6 aluminium and is what creates the smooth dual axis movement around the attachment point. Our custom super grip magnet produces over 400 LBS of grip force and is protected in a steel casing. Our proprietary dual axis system has a unique design feature that allows the magnet to be easily released.
